

Consequences Of Gay Lifestyle Far-reaching

Published on 9/7/2004

Letters To The Editor:

Bethe Dufresne succeeded in breaking my heart in her article, "Tired of waiting, gay couple takes legal path," published Sept. 2, but not for the reasons she cited. My heart breaks for women who have settled for the lie that having a "relationship" with another woman can even approach our wonderful Creator's divine plan for marriage.

Just because a person says he or she is "happy," does that mean we are to validate their lifestyle? Make no mistake, the consequences of a homosexual lifestyle are far-reaching and devastating—not just physically but emotionally and spiritually as well.

As a woman who counsels and ministers to other women on a consistent basis, I have seen firsthand the brokenness, confusion and emptiness that accompany this lifestyle. The consequences are not only personal but corporate as well.

History itself reveals the consequences of those "progressive" societies that have "tolerated" then embraced this sad lie. The Roman Empire is a perfect example — it no longer exists. Let's all wake up, with compassion, before it's too late. ■
